

Practicalities of Geography With Special Reference to Teaching Technique

Dr. Prolay Mondal

Abstract : *This paper contribution begins with a presentation of the thirteen years teaching experience that signify this part of the geography teaching, which are: progress of geography teaching technique, use of ICT in geography teaching, Smart class concept and GIS technique for physical geography education. It is the investigation of the beginning of the advance of modern geographical teaching method, in which the scientific, institutional, teacher's personal skill, social and political fundamental contexts are presented. It's also the report of the basis of the geographical teaching approach, what geographers do and what they think in India. There is a part enthusiastic to the traditional focus on the study of West Bengal and how it has evolved through the years. The present day interdisciplinary of subject matters in geography is very much force to introduce smart class teaching technique. The article ends with an argument on the present situation to launch Smart Class concept as well as modern computer based teaching technique and with an overview of the future prospects in the geography teaching technique.*

Keywords : Modern geographic teaching, Smart class, Interdisciplinary approach, Dilemma between traditional and modern geography teaching method

Introduction

In new era, one of the essential aspects of everywhere computing is the instrumentation of the real world by smart devices. This instrumentation also takes place in geography teaching technique. The chapters of geography present by teacher through different methods or different techniques approach. Recent trends in geography subject to introduce remote
